Gotcha

Baton Rouge

Gotcha improved its bike share design which has caused a delay in the production of the e-bikes for Baton Rouge. The team enhanced the quality of the bike's locking mechanism, ensuring proper security for each e-bike

The Gotcha team is preparing to install bike share hubs around Baton Rouge that will feature our informational and way-finding panels. The way-finding panels will include safety instructions, app download instructions, and a map for the bike share hub locations within the downtown and surrounding area.
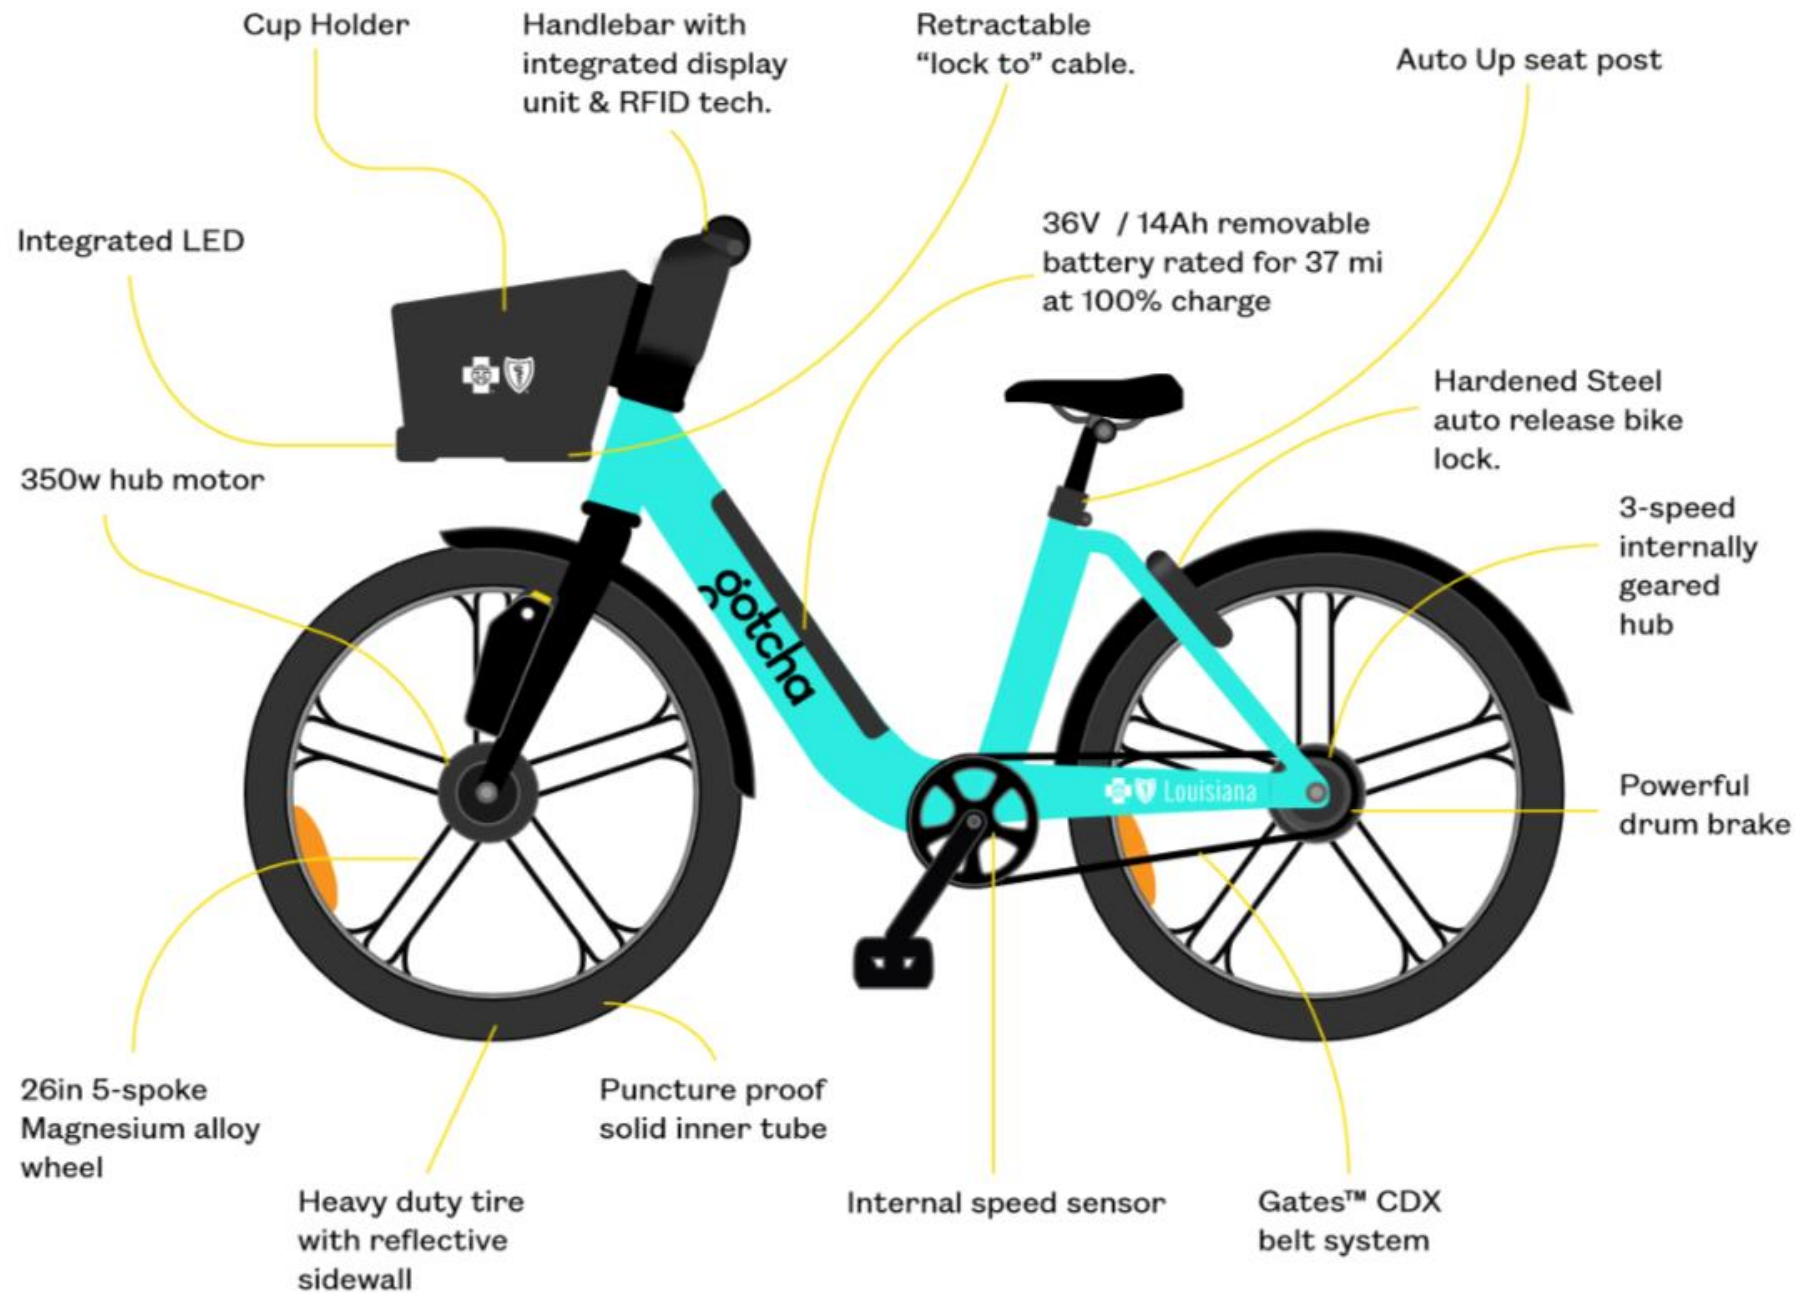

Our current production schedule for this installation is slated to begin later this week and continue through the weekend of June 23rd. We will start in the Downtown Baton Rouge area with LSU and Southern University to follow.
